

## **ABOUT CODINA.IO**

Codina provides services to succeed crypto trades on **BINANCE Digital Exchange** based on mathematics and statistics, which are packaged in a Turn-Key automated trading bot that operates through codina website [ <https://www.codina.io> ] or codina mobile application.

Codina's service can execute trades automatically on its members' crypto asset stored in their Futures Wallet in BINANCE Digital Exchange through the existence of personal API Key and Secret Key.

## **TERMS AND CONDITIONS**

[ v 3.1.2 updated on 1 June 2020 ]

This TERMS AND CONDITIONS document govern the rights and obligations between the Member as the one who uses the service of codina, and the codina as the service provider, which includes codina mobile application(s), codina.io website, all subdirectories, provisions or conditions for the trading, trading automation and also payment, transaction, marketing, affiliate and also other conditions relating to codina usage and the system relating to it.

By completing the registration on the codina website [ <https://codina.io> ] or codina mobile application and or accessing on any other codina platform(s), then you are already a codina Member [ user ] and you agree to the contents of these entire TERMS AND CONDITIONS.

Codina as the service provider has the right to change, add or subtract part or all of the contents of these TERMS AND CONDITIONS any time, either temporarily or permanently, and with notice or without prior one. The change(s) includes and is not limited to feature modification, technology modification, service termination, price or fee modification, referral system change, affiliate plan change, and business model modification.

By agreeing to these TERMS AND CONDITIONS, you agree to all the provisions in this document and its change(s). If you do not agree with some or the whole of these TERMS AND CONDITIONS, do not register on codina and do not use the service of codina. If there is a form of violation to these TERMS AND CONDITIONS, then codina as the service provider has the full rights to take action against the violation which can refer to and is not limited to: Removal of Member account, Removal of some or all of the remaining bonus or credit(s) [ if any ], Cancellation or Closing of any remaining trade(s) and Legal process in force.

### **1. GENERAL**

A Member or also called User is anyone that has registered to the codina mobile application or codina website [ <https://codina.io> ]. It is not permitted to register through automation methods, and every Member is fully responsible for the security of his or her account, password, and any other data given to codina.

Every Member understands that codina is affiliated and cooperates exclusively with third parties to run systems and services, including hardware, software, exchange(s), legal entities, banking, blockchain, financial institutions, communication companies, technology companies, digital marketers, social media and also various network systems. Every Member acknowledges and agrees that a part or all of the information about him or her given to codina can be used by codina and can be distributed, stored or processed by third parties, which is needed to optimize the services especially in terms of quality improvement, data storage, server and data analysis.

Every Member is aware and agrees to deal with risks that can occur from service, product, marketing, crypto trading, exchanger and their consequences. Risks that can occur are not limited to network inactivation, service inactivation, change in server, trading quality, system communication quality, system execution, value of crypto, crypto volatility, change in affiliate plan, errors or malpractices from third parties, declining product quality, data theft, data error and or data damage.

Codina does not guarantee of [1] the quality of service that meet the needs of Member(s), [2] codina services that run without error(s), [3] accuracy of the results obtained from the use of service, [4] the quality and volatility of market or order book, [5] the quality of trade automation, [6] information that matches the expectations of Member(s), and [7] practices committed by third parties.

Every Member agrees not to make programming modifications, falsification, duplication, copy-trade, rental and or damage to the systems and services contained in codina.

All forms of threats and intimidation towards codina or any other Member are prohibited.

Codina as service provider has the right to delay or to refuse or to close the trade(s) if codina service provider considers that the transaction or the account is suspicious or refers to fraud, copy-trade, and or criminal action.

## **2. CRYPTO TRADING**

A crypto trading is a high-risk activity since crypto prices are volatile where prices can change significantly over time. Every Member has to use extra consideration in making the decision for crypto trading. Every Member understands and agrees that every transaction or trade made by codina is final and no cancellation can be made by the Member. By being registered as a Member, every trade or transaction ordered by the codina system is a full responsibility of the Member.

## **3. REGISTRATION & NEXT STEPS**

Everyone can register an account to codina system through codina website [ <https://codina.io> ] for free by using a Google account. A single Google account can not be used for registering more than one codina account. Despite of the limitation of the market size, codina as service provider has a right to stop the registration service for a new member, temporarily or permanently. By the registration, each member must complete the KYC [ *Know Your Customer* ] for certain security reasons.

Every Member who wants to run the codina automated trading must have a Binance account, where every trade occurs. After a Member has a personal account on Binance, activate the **Enable Futures** on his or her Binance account, **deposit USDT** on his or her own **Futures Wallet** on Binance, and also connect his or her Binance account to his or her codina account through personal **API Key** and **Secret Key**, then the automated trading on codina can be activated. These steps can be found on the website after a Member registers to codina.

## 4. MEMBER WALLETS

By having a Binance account, every Member has a personal **SPOT Wallet** and **Futures Wallet** [ *Future Account* ] within his or her Binance account. The SPOT Wallet is the main wallet to transfer and receive crypto from external resource. The Futures Wallet is the wallet that must contain the crypto assets that will be used in the codina automated trading.

Note : Codina as a service provider **NEVER** asks a right to withdraw a Member's asset. That is why every Member **must uncheck the Enable Withdrawals** in the API Key and Secret Key section.

## 5. TRADING LOT, SUBSCRIPTION FEE & GUARANTEE

### FREE TRIAL

A Member that has registered on codina and completed his or her profile as mentioned above, can activate the automated trading with a minimum lot of **15 USDT** and a maximum lot of **500 USDT** for the first 30 days [ *or more, depends on the temporary bonus given* ] with **ZERO** subscription fee. The first 30 days free trial period starts on the day when the Member activates the trading bot on his or her codina account.

### 30-DAYS SUBSCRIPTION

After the free trial period mentioned above, each Member will receive a Billing with its Grace Period of 5 [ *five* ] days to subscribe the trading bot for the next **30-days** with a Billing calculation : "**10% of Average Trading Lot from previous 30-days**".

The **Billing Cycle** after the Free Trial period is 30 days. By finishing the Billing [ *transfer from wallet to wallet* ], the trading bot is able to run with maximum lot of **unlimited** [ *this depends on the market size* ] for next 30 days. This 30-days Subscription scheme is valid for any next periods.

### GUARANTEE

A 30-days Subscription mentioned above will be **100% discounted** if the previous 30-days' profit is less than 20% of Average Trading Lot. This means, the Member will receive the Billing with **ZERO Fee** and the subscription is extended automatically to the next 30 days [ *next Billing Cycle* ].

The guarantee will be **INVALID** if there is at least a single open or close trade triggered or altered :

- MANUALLY by the Member, or
- through execution from other trading bot(s)

NOTE : Changing the parameter of the trade(s) manually and withdraw funds while the Bot is active are included to this case. Changing the parameter of the trade can be, and not limited to, the value of Take Profit or Stop Loss. Please read next chapter “Risk of Interruption on Automated Trading”.

Any manual execution by the Member [ through his or her personal Binance or other Trading Bot(s) ] will tarnish the Guarantee, but Codina offers a feature to **close** each or all **open trade(s)** to the market manually. This feature can be executed **ONLY** through each Member page on codina website and through this feature, the guarantee is still valid.

**CANCELLATION & ACCOUNT LIMITATION**

If a Member has not paid the 30-days Subscription Fee until the end of the grace period of 5 [ **five** ] days after the actual 30-days period finished, then the automated trading will be stopped and there is chances that the open position can not be managed.

The subscription will be continued after the Member had finished paying the delayed 30-days Subscription Fee and an additional of **20 USDT penalty**, and contacted the codina Account Manager mentioned on the website or mobile application.

**6. RISK OF INTERRUPTION ON AUTOMATED TRADING**

By activating the trading automation or bot, it will run giving orders [ *open trade / close trade* ] to the **BINANCE Digital Exchanger** that executes Member’s crypto assets. By deactivating the Bot, it will stop giving order.

A Member has an authority on his or her Digital Exchanger account to manually open or close every trade, but manually executing or using other system to execute a trade is very risky and is **PROHIBITED**, because it will have the risk of disrupting the current trading order and trading plan, and it can have impacts on the Member's crypto. This risk is borne entirely by the Member. If a manual execution occurs, Codina has the right to close [ *close market* ] all of the Member’s trades and or to ban the Member account, and it could result of crypto loss and a reduction of next trading plan’s quality. This risk is borne entirely by the Member.

A Member is also **PROHIBITED** to withdraw funds in a Digital Exchanger **while the Bot is active** or **when there is one more more transaction(s) that is still open** [ *open trading position* ] because this will impact the active margin calls and contain risk of crypto loss. This risk is borne entirely by the Member.

All of the points mentioned on chapter “Risk of Interruption on Automated Trading” will tarnish the Guarantee mentioned on the previous chapter.
